PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js), with additional experience in Java, Spring Boot, and PostgreSQL. Skilled in RESTful API development, frontend development, database integration, debugging, testing, and building maintainable software solutions. Currently pursuing a BSc in Software Engineering at Haramaya University.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer Intern
Information Network Security Administration (INSA)
02/2026 – Present | Addis Ababa ,Ethiopia

- Develop and maintain full-stack features for the **Integrated Tax Administration System** using **React.js, Spring Boot, and PostgreSQL**.
- Design and implement **RESTful APIs** using Spring Boot for frontend-backend integration.
- Develop responsive frontend functionality using React.js and integrate backend services.
- Work with PostgreSQL databases, including data modeling, queries, and application-level data access.
- Debug application issues, perform testing, and investigate problems to improve reliability and performance.
- Collaborate with team members in an Agile development environment to implement requirements and deliver software features.
- Use Git-based version control and established development workflows for collaborative software development.

Freelance Full Stack Developer
Self-Employed
01/2024 – Present

- Built and deployed **10+ full-stack web applications** using React.js, Node.js, Express.js, and MongoDB.
- Designed and implemented RESTful APIs and integrated frontend applications with backend services.
- Developed authentication, data management, dashboards, e-commerce functionality, and appointment-management features.
- Debugged application issues and improved usability, responsiveness, and performance.
- Worked directly with clients to analyze requirements, define technical solutions, and deliver projects within agreed timelines.
- Maintained source code using Git/GitHub and deployed applications using modern hosting platforms.

Full-Stack Developer — Freelance / Upwork
Upwork
03/2026 – Present

- Developed full-stack web applications for clients using **React.js, Node.js, Express.js, MongoDB, and related technologies**.
- Worked directly with clients to understand requirements, propose technical solutions, and deliver project milestones.
- Designed responsive user interfaces and integrated frontend applications with backend APIs.

KEY ACHIEVEMENTS

Completed 10+ web development projects with 100% client satisfaction

Built and deployed multiple full-stack applications using modern technologies

Contributed to open-source projects on GitHub

Earned professional certifications in Full Stack Development and Programming Fundamentals and More certifications

EDUCATION

Bachelor of Science in Software Engineering
Haramaya University
2023 – Present

- Focus on full-stack development, algorithms, and software architecture
- Relevant coursework: Data Structures, Web Development, Database Management, Software Engineering

TECHNICAL SKILLS

Frontend Development

- React.js, Next.js, JavaScript, TypeScript
- HTML5, CSS3, Tailwind CSS, Bootstrap
- Responsive Design, UI/UX Design

Backend Development

- Node.js, Express.js, Spring Boot , Java
- MongoDB, MySQL, PHP,PostgreSQL
- RESTful APIs, Authentication

Tools & Technologies

- Git/GitHub, Version Control
- Vercel, Netlify ,Docker(Deployment)
- Figma (Design)
- Chart.js (Data Visualization),
- Linux (Ubuntu) ,
- Automated Testing and Debugging

FEATURED PROJECTS

Integrated Tax Administration System (ITAS)
Collaborative Software Engineering Project | INSA
02/2026 – 09/2026
Technologies: Java, Spring Boot, React, PostgreSQL, Git/GitHub

- Implemented and debugged application functionality while maintaining clean and maintainable code.
- Used Git/GitHub and modern web-development workflows for project development and delivery.
- Successfully completed client engagements and maintained strong client satisfaction.

INTERESTS

- Open Source Contribution
- UI/UX Design
- Learning New Technologies
- Problem Solving
- Open to Opportunity

- Contributed to the development of an integrated tax administration application for the Ministry of Revenue.
- Collaborated with team members to implement and improve application functionality.
- Used Git and GitHub pull requests to collaborate on code changes and integrate contributions into the project.
- Worked with REST APIs, backend services, database integration, and software debugging.
- Github : https://github.com/Paul-dir/itas-audit-system

E-Commerce Platform
Technologies: React.js · Node.js · Express.js · MongoDB · REST APIs

- Developed a full-stack e-commerce platform using **React.js, Node.js, Express.js, and MongoDB**.
- Implemented shopping cart functionality and integrated **online payment processing**.
- Built an administrative dashboard for managing products and customer orders.
- Developed **RESTful APIs** to support communication between the frontend and backend.
- Implemented product and order management workflows for the e-commerce platform.
- Designed a responsive user interface for browsing products and completing purchases.

GitHub:
github.com/Borifan02/E_commerce_website

Food Ordering Platform
Technologies:React.js · Vite · Node.js · Express.js · MongoDB · Mongoose · JWT · Jest · Supertest

- Developed a full-stack food ordering platform supporting **Customer, Administrator, and Delivery Personnel** workflows.
- Built RESTful backend APIs with **Node.js and Express.js**, using MongoDB/Mongoose for data modeling and persistence.
- Implemented **JWT-based authentication and authorization** with role-specific access and workflows.
- Developed customer features including menu browsing, category filtering, cart management, order placement, order tracking, and reviews.
- Built administrative functionality for menu/category management, order management, delivery personnel management, and **PDF sales report generation**.
- Implemented delivery workflows for accepting assigned orders and updating delivery status from **Preparing → On the Way → Delivered**.
- Added automated backend testing with **Jest and Supertest**, covering authentication, orders, menus, reviews, delivery, and reporting; the project currently reports **39 passing tests across 6 test suites**.

- Deployed the frontend/backend architecture using **Vercel and Render** with MongoDB Atlas. **GitHub:** github.com/Borifan02/Food-ordering-web-app **Live Demo:** foodorderingweb-kappa.vercel.app

CryptoTrack — Cryptocurrency Tracking Platform
JavaScript · Node.js · Express.js · CoinGecko API · Chart.js

- Built a full-stack cryptocurrency tracking application integrating the **CoinGecko API** for real-time market data.
- Developed search and filtering functionality for **1,000+ cryptocurrencies**.
- Implemented interactive charts with **Chart.js** for cryptocurrency price visualization.
- Added historical price analysis with customizable time-range selection.
- Developed backend functionality using **Node.js and Express.js** for API integration and application services.
- Designed a responsive interface for exploring and analyzing cryptocurrency market information.

Live Demo: https://crypto-track-mauve-delta.vercel.app/
GitHub: https://github.com/Borifan02/cryptoTrack

TeamSync — B2B Team Project Management SaaS
Technologies:React.js · TypeScript · Node.js · Express.js · MongoDB · Mongoose · Google OAuth · Tailwind CSS · Shadcn UI · Vite

- Developed a **multi-tenant B2B project management SaaS** for teams to manage workspaces, projects, epics, tasks, and team members.
- Implemented authentication using **Google Sign-In and email/password**, with secure cookie-based session management.
- Designed **role-based permissions** for Owner, Admin, and Member roles across workspaces.
- Built project and task management workflows including CRUD operations, task status, priority, assignment, filtering, search, and pagination.
- Implemented workspace member invitation and team-management functionality.
- Developed an analytics dashboard to provide insights into project and task activity.
- Used **Mongoose transactions** to maintain data integrity across related database operations.
- Built the frontend with **React, TypeScript, Tailwind CSS, Shadcn UI, and Vite**, with a responsive user interface.
- Deployed the application with separate frontend/backend configuration and environment-based settings.

GitHub: github.com/Borifan02/Advanced-Team-Project-Management-Saas **Live Demo:** advanced-team-project-management-sa.vercel.app

CERTIFICATIONS

Become a Fullstack Developer from Educative

- Comprehensive training in MERN stack development
- Hands-on projects and real-world applications. https://www.educative.io/verify-certificate/Z4JLg2tXEox9kZMrOIXryllBJ1glhV

Programming Fundamentals from Udacity

- Core programming concepts and best practices
- Problem-solving and algorithmic thinking.
- and more Certifacations that i gain Experiences and strong knowledge from it.
